

## Rain Warning

When rain falls through polluted air it changes the water and makes it more acidic. Polluted air comes from the smoke from a fire, chemicals released from a factory smokestack, or exhaust from cars, trucks, boats, buses, planes and even lawn mowers. This polluted water becomes **acid rain**.

To figure out the hidden message below, cross out the two words that appear over and over in the puzzle grid and read the remaining words.

CLEAN ACID WATER RAIN CLEAN  
WEAKENS WATER PLANTS CLEAN AND  
WATER IN CLEAN SOME WATER CASES  
CLEAN CAN WATER EVEN CLEAN KILL  
WATER THEM!

WARNING: \_\_\_\_\_
