

Endangered Species

| | |
|--------------------|---|
| Endangered Species | A plant or animal that is considered in danger of becoming extinct. |
| Extinct | When the last of an animal dies. |
| Habitat | Where an animal lives. It might be a vast rainforest or a tiny anthill. They have food to eat and a safe place to sleep and raise their babies. |

The most endangered species include:

- Black-footed ferret
- Giant panda
- Mountain gorilla
- Snow leopard
- White rhinoceros
- California condor
- Ibex
- Orangutan
- Sumatran rhino
- Yangtze dolphin

Directions: Choose an animal from the list above and draw and color a picture of it in the box below. Check in books or on the internet for a picture to copy.
