

# Water, water everywhere

## Does it matter, do we care?

~ A message in a bottle is a form of communication where a message is sealed in a watertight container and released into the ocean or sea.

~ The first recorded message in a bottle was in 310 BC by the Ancient Greek philosopher Theophrastus.

~ In the 16<sup>th</sup> Century the English Navy used bottle messages to give information about enemy positions.

~ A message sent in 1783 was eventually recovered in 1935 at the birthplace of the original sender.

## H2O

- Water has no beginning and no end
- The amount of water on the Earth has stayed pretty much the same since the beginning of time.
- Water exists in three forms: solid, liquid, gas

Please do your part to conserve  
our water supply, and to keep it  
clean and free of pollution.
