

Weeds

A weed is a plant that is not wanted. Weeds grow in gardens, fields, lawns and parks. Plants can be considered to be weeds in one setting but not weeds in other environments. For example, clover is a weed when it is found in your lawn, but it is also a source of honey.

Look at the pictures below and see if you can identify these plants that are commonly considered to be weeds. Draw a line from the word to the plant.

clover

dandelion

poison ivy

ragweed

thistle

tumbleweed
